Enabling Your GRC Success Through Powerful, Agile and Scalable Software

"Helping customers understand how GRC helps firms meet goals, influence business decisions, and Board strategy is in Camms' DNA"

Forrester Wave[™] Governance, Risk & Compliance Platforms Q3 2021

An Integrated Approach to GRC

Create risk intelligence to drive business success

Our GRC platform offers the unique ability to link risk to business objectives empowering your organization to reliably achieve objectives, navigate uncertainty and demonstrate integrity.

Our cloud-based solution is highly configurable, flexible, and easy to use. Its integrated nature facilitates mapping across GRC use cases - creating risk intelligence to support strategic decision-making.

Risk Management

Identify, track and manage risk with confidence. Build risk registers, conduct risk assessments and set controls & KRI's.

Audits & Inspections

Schedule and manage internal and external audits and effectively deal with findings and recommendations.

Incident Management

Report actual incidents and near misses, conduct investigations, determine impact, and monitor cases until closed.

Compliance

Set up an obligations library and ensure compliance with regulations, policies and procedures. Manage regulatory change.

Policy Management

Create a digital library of live policies and manage approvals, escalations, and changes. Track expiry dates and collate attestations.

Regulatory Change

Receive notifications of upcoming regulatory changes, analyse their impact, and implement workflows to accommodate the changes and ensure compliance.

ل ب	
(+)	,

Health & Safety

Maintain health and safety registers, identify and deal with hazards and record actions to acheive compliance.

Registers & Workflows

Digitize and automate any business process and bring it online with online forms, searchable registers & logs, and flexible workflows.

8	
وكع	

Third Party Risk

Manage vendor onboarding, risk assessments, contracts, performance, and SLA's to manage and mitigate third party risk.

Operational Resilience

Build a business continuity plan with a library of all your critical processes. Perform BIA's and conduct scenario & vulnerability testing.

ESG

Plan and execute your ESG strategy and confidently report on the progress of key metrics and initiatives.

Ċ	

Strategy Planning

Plan and execute your strategy by breaking it down into smaller tasks, projects and actions with clear deadlines to easily track progress - all linked to your GRC program.

Cyber & IT Risk

Manage your exposure to IT risks with integrated risk registers and workflow tools specifically for IT.

Project Management

Effectively plan and manage projects in a collaborative way with clear deadlines and actions.

Camms.College

Get the most out of the Camms platform with our online training portal. Includes 250 hours of training, virtual user groups, product walk throughs and virtual consulting.

10 Reasons to Choose the Camms GRC Platform

Our configurable, cloud-based solution facilitates a collaborative approach to risk enabling your entire organization to feed into your GRC program - to create a risk-aware, accountable culture.

One Integrated Cloud-Based Platform

The Camms platform is built from the ground up using single source code. This enables complex mapping between governance, risk compliance strategic planning and project management, providing deeper insights and risk intelligence.

Modular & Scalable

The modular nature of the solution enables organizations to start out by implementing modules that meet their immediate needs. Typically, our clients start out with core modules like Risk Management, Compliance and Incident management and add more functionality as and when required.

Highly Configurable

Our platform is highly configurable which means admins can easily amend reports, menus, and dropdowns to meet the bespoke needs of the organization without costly professional services fees. This allows organizations to adopt our out-of-the-box solutions quickly and further customize them as the solution becomes embedded.

Out-of-the-Box

Structured best-practice frameworks, online forms, out-of-the-box templates, automated process workflows, and live dashboards & reports make it easy for GRC professionals to collate the information they need from stakeholders across the organization to get a holistic view of risk.

API Integrations

The Camms solution enables you to pull in data from other systems and sources via APIs – enabling you to set controls and key risk indicators against live transactional and operational data and view regulatory content updates. You can also link the tool to your active directory, enabling employees to select staff, departments, and locations when logging risks & incidents and for escalations & approvals.

Link Risk to Strategic Goals & Performance

Most organizations are willing to accept a certain level of risk in pursuit of their enterprise performance goals & strategic objectives. The Camms solution is one of the few GRC platforms that enables teams to plan and execute their strategic objectives alongside risk management in the same platform to understand the impact of risk on organizational strategy.

Rapid Time to Value

Our solutions can be implemented quickly for fast return on your investment. Our average go-live time is around 3 months and can be even faster for out-of-the-box implementations.

Risk Intelligence

The solution provides risk & compliance teams with the insight they need to protect the business, navigate uncertainty, and advise leadership teams on the best course of action through a series of insightful dashboards & reports.

Industry Recognized

Camms GRC platform is recognized by a number of leading analyst and review organizations including Gartner, Forrester, Chartis Research, G2 and Capterra. We were ranked as a strong performer in the latest Forrester Wave[™] for GRC Platforms, Q3 2021, cementing our global strength as a leading GRC software provider.

Camms offer software capabilities that reflect functional needs and obligations, whilst enabling a fully collaborative and integrated approach. The platform facilitates effective information flow helping organizations to improve oversight of risk & compliance, produce effective reports, and make the right decisions.

> Adam Collins CEO, Camms

Committed Customer Support

Our customer support team is there for you through every step of your implementation to ensure you get the most out of the Camms platform. We deliver solutions for those struggling with spreadsheets right through to large scale Enterprise level implementations, and everything in between.

GRC Capabilities

Risk Management

Identify, track, and manage risk creating risk intelligence to support decision making and resource allocation.

- Create online risk registers with predefined frameworks to categorize, rate and monitor risk.
- Roll out risk assessments surveys & tasks online with all data feeding directly into the tool.
- Use automated workflows to approve and escalate risk and implement detailed risk treatment plans.
- Pull data into the tool from other systems & sources via APIs to monitor risk.
- Establish control frameworks in line with ISO 31000, COSO and SOX.
- View comprehensive dashboards & reports for risk analysis & link risk to strategic objectives.
- Log incidents and near misses online or via the mobile app.
- Conduct investigations to determine impact and implement controls and treatment actions.
- Utilize automated workflows for approvals, signoffs, and escalations.
- Trace incidents back to the originating risks.
- Incident reporting portal for vendors, third parties and anonymous whistle blowing.
- View dashboards & reports to understand the source of incidents to reduce future occurrences.

Compliance

Identify and effectively manage your compliance obligations and provide demonstrable proof of compliance.

- Create an online cyber risk register with predefined frameworks to categorize & rate risk.
- Log cyber incidents online and work them through to resolution with automated workflows.
- Implement automated control monitoring to detect cyber threats and vulnerabilities.
- Utilize best-practice frameworks to manage data privacy regulations like GDPR, PCI DSS and NIST.
- View dashboards and reports to build a holistic view of cyber risk.
- Build a centralized, searchable audit register.
- Capture findings online and use automated workflows to implement corrective actions.
- Audits can be linked back to any associated risks or compliance obligations.
- Automated reminders ensure you never a miss an audit and notifications are sent for outstanding & overdue actions.
- Dashboards & reports provide a complete overview of your audit universe.
- Eliminate spreadsheets & legacy systems.
- Popular use cases include: feedback & complaints, conflicts of interest, gifts & gratuities, disclosures, contractor management, inspections & site checks, whistleblowing, chemicals register, questionnaires and much more.
- Online forms, automated workflows, digital registers & logs, and real-time dashboards & reports make it easy to capture and visualize information.
- External facing portal for suppliers & contractors.
- Managing everything in one platform enables organizations to link their business processes to their wider GRC program.

Third Party Risk

Ensure the vendors, suppliers and third parties that you depend on are not exposing your organization to unnecessary risk.

ESG

Plan and execute your ESG strategy and confidently report on the progress of key metrics and initiatives.

- Maintain critical business operations during and after a disruption.
- Create an online register of all your critical business processes.
- Access best-practice BCM plan templates.
- Perform risk and business impact assessments and dependency mapping.
- Conduct scenario and vulnerability testing.
- View dashboards & reports to identify gaps in your BCM plans.
- Set out a strategy to manage strategic risk and ensure long-term resilience.
- Create an ESG strategy based on your goals & objectives.
- Monitor ESG risk and implement controls & corrective actions.
- Best-practice ESG related incident reporting.
- Track compliance against ESG related obligations.
- Report on key ESG initiatives through insightful dashboards & reporting.

Camms.

Who We Work With

We work with a vast arrange of organizations from across the globe to improve their GRC processes and help them to achieve their strategic goals and objectives.

We thrive on watching our clients achieve results and stay a step ahead.

Here is a selection of our clients:

Customers tell us they love using Camms software solutions because they are easy to use, intuitive and truly help them to be better organizations

Tulane University

Lenovo

CREDIT SUISSE

NCFE

ROYAL

United Therapeutics

What do our clients think of the Camms platform?

"Camms' software has been transformational in how we, as an organisation, reports and manages its risks. This is in part down to the software but can also be attributed to the world class leaders they have access to in the risk field. It is helping us have a better understanding of our strategic risk profile and to make better decisions."

User at a Defence & Space organisation with more than 1000 Employees

"Camms provides a seamless integration experience with multiple modules, including incidents, audit, and compliance, ensuring a comprehensive overview of assurance and compliance levels. The reporting mechanisms and production capabilities are not only visually appealing but also highly dependable. Moreover, its user-friendly interface is designed to be intuitive and straightforward, allowing our staff to effortlessly navigate the system with minimal training."

Steven Watson, Assurance Manager at NCFE

Camms. Software to Change Tomorrow.

Organizations today need a next-generation GRC platform that can consolidate disparate processes, systems, and data sources into a single, holistic solution, delivering deep insight into the risk profile, status, and performance of every part of the organization.

Create a culture where everyone is responsible for risk and generate business intelligence to avoid risk, remain agile, improve enterprise performance, and achieve your strategic goals & objectives.

Contact Camms today to discuss how we can help redefine the way your organization pursues opportunity, manages risk and makes decisions with the help of an easy-to-use solution that provides a comprehensive integrated approach to governance, risk, compliance and strategic planning.
