

Automate Any Business Process with Online Workflows & Registers

Camms.
Software to Change Tomorrow.

Automate Any Business Process

You'll be surprised just how many business processes you can manage within the Camms platform. Alongside our core GRC capabilities, the Camms platform can digitise and streamline your business workflows & registers by bringing any business processes online.

Eliminate outdated manual processes that rely on spreadsheets & emails.

Bring manual workflow processes online.

Capture data via online forms that feed directly into the platform.

Automate signoffs, approvals, and escalations.

Create searchable online registers & logs.

Establish an external online portal to collect data from third-parties.

Get immediate insights from your data through insightful dashboards & reports.

Flexible & Configurable

Configure forms and workflows to meet your individual needs without the need for customised code.

Simple User Interface

Easy to use and highly intuitive to maximise user adoption.

Access on Multiple Devices

Accessible via a range of devices and includes a mobile app to collect data on the move.

Out-of-the-Box

Solutions can be implemented quickly to meet your immediate business needs.

Automate Any Business Process

The flexible workflows and registers available within the Camms platform enable organisations to automate any business process and bring it on-line. Here are just some of the business processes that our clients are currently automating in the Camms platform alongside our GRC, strategic planning, and project management capabilities.

Feedback & Complaints

Inspections, Audits and Checklists

Contractor Management & Inductions

Anonymous Reporting & Whistle-blowing

Dangerous Goods/Hazardous Chemicals Register

Questionnaires & Surveys

Health, Safety & Wellbeing

Issues SCI's & Deficiencies

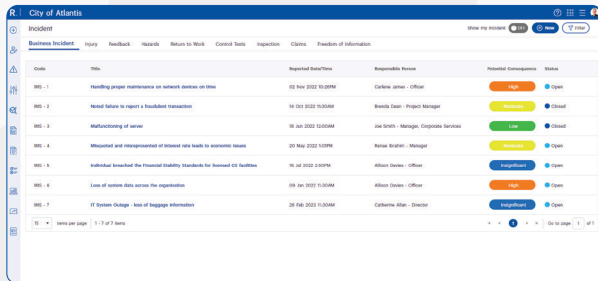

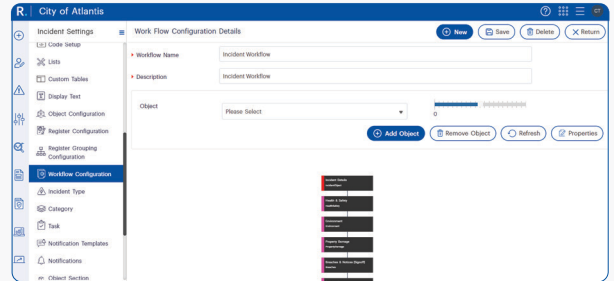

How does it work?

The tool enables organisations to replace spreadsheets and manual processes with a structured comprehensive best-practice system. The online forms, workflows and digital registers reduce the administrative burden, increase operational efficiency, and provide deep insights into business performance.

Key capabilities include:

Workflows

Create flexible, intuitive workflows to automate any process including; allocating tasks & actions and capturing escalations, approvals, and signoffs. Automated alerts & notifications are sent via email & SMS based on a wide variety of trigger criteria.

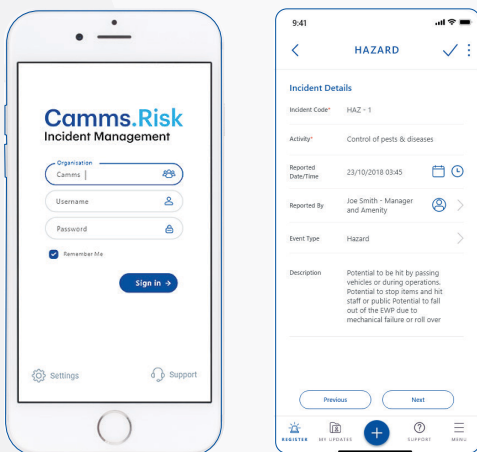

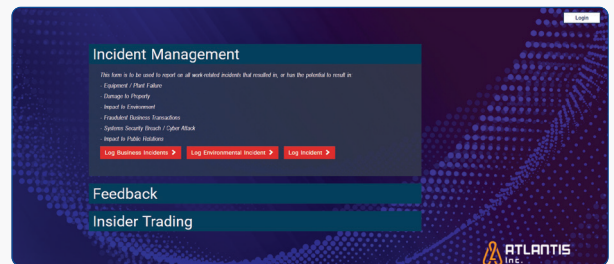

Registers

Create centralised searchable registers and logs with customisable filters and categorisation. Online forms are used to create new records in the register - ensuring the relevant details are captured.

External Facing Portal

An external facing portal enables vendors, contractors and other third parties to submit online forms, questionnaires, and surveys - with all data feeding into the platform.

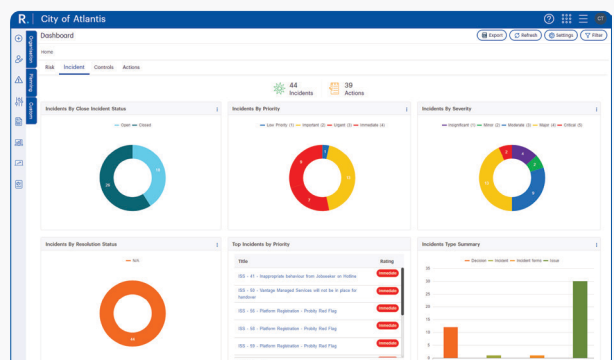

Mobile App

A mobile app enables staff to complete forms & tasks and receive notifications on the move.

Dashboards & Reports

Configurable dashboards & reports enable leaders to scrutinise data and make decisions.

Camms.

Software to Change Tomorrow.

How Many Business Processes Could You Consolidate into the Camms Platform?

Alongside our core GRC capabilities the Camms platform has the power to automate any business process and bring it online.

The flexible workflows & registers available within the platform can be used to manage a whole host of business processes. From setting up logs to manage incidents, business processes, opportunities, issues, assets, and gifts & hospitality to formalising processes for control testing, feedback & complaints, conflicts of interest, disclosures, and vendor & contractor management - the system brings all the processes together in one integrated platform.

Create a single source of truth for a whole host of business processes and map data across different areas to generate deep insights into operational performance.
